PROFESSIONAL SUMMARY

I am a senior Industrial Engineering student at Hacettepe University with a focus on business analysis and process optimization. Through my current role as a Long-Term Business Analyst Intern at IBTECH and previous experiences in production and supply chain, I have developed strong skills in SQL, SDLC management, and technical troubleshooting. I want to apply my analytical mindset and technical background to solve challenging engineering and business problems.

EDUCATION

Hacettepe University – B.Sc. in Industrial Engineering (2021–2026) | GPA: 2.81/4.0

SKILLS

- **Technical:** SQL, Python, Power BI, AutoCAD, Minitab, ERP (LOGO), Microsoft Project, MS Office.
- **Methodologies:** Business Analysis, Process Optimization, Supply Chain Management, Production Planning, CPM, PERT, Monte Carlo Simulation.

PROFESSIONAL EXPERIENCE

IBTECH Technologies | **Business Analyst Intern**|September 2025 – March 2026 | Ankara, Turkey

- Managed SDLC processes by bridging communication between business units and IT teams to ensure technical requirements aligned with organizational goals. Developed functional analysis documentation and monitored project milestones while utilizing SQL for backend troubleshooting and Python for data analysis and process automation tasks.

Makine ve Kimya Endüstrisi A.Ş. (MKE) | **Production Planning Intern** | June 2025 – July 2025| Kırıkkale, Turkey

- Optimized operational efficiency using ERP systems for real-time job order tracking and production scheduling. Conducted capacity utilization analyses to identify bottlenecks and contributed to process improvement initiatives within a high-scale industrial environment.

Balıkçı Metal | **Supply Chain and Purchasing Intern** | August 2024 – September 2024|Ankara, Turkey

- In this role, I worked on international procurement and evaluated suppliers for imported materials. I analyzed inventory levels and suggested new ideas for Just-In-Time (JIT) and forecasting models. Additionally, I used LOGO and Deys Backoffice software to track all supply chain and procurement steps from start to finish.

BioArt Laboratories | **ESC Project Intern** | June 2023 – August 2023 |Eindhoven, Netherlands

- Developed practical technical skills through international restoration and renovation projects.

ACADEMIC PROJECTS

TUSAŞ – Air Vehicle Design and Development Project Scheduling With Uncertain Activity Durations| *2025 – 2026*

- Designed a deterministic project baseline for high-complexity systems using Critical Path Method (CPM). Analyzed a network of activities to optimize schedule flexibility and applied PERT and Monte Carlo Simulations to evaluate time sensitivity and risk indicators.

ACHIEVEMENT & CERTIFICATIONS

- **TEI Aerospace and Engine Technologies Seminar** (2025)
- **Google Machine Learning & AI** (2024)
- **Corporate Relations & HR Coordinator** | IAESTE Hacettepe (2023–2024)
- **Education Unit Coordinator** | Hacettepe Industry & System Community (2022–2023)
- **Team Leader** (Volunteer)| UEFA Champions League Final, Istanbul (2023)
- **Volunteer** | TVF Volleyball Nations League & Club World Championship (2021- 2022)
